Urban Public Finance in the Seventies	100
Urban Public Finance Systems	109
Government Strategies in Selected OECD Countries	118
Public Finance Problems in the Eighties	128
An Assessment of Selected Financial Strategies	136
Financial Strategies for the Eighties	145

Many OECD cities are suffering from a declining population and economic base, while others are trying to cope with rapid growth. In both cases urban finance has become an increasingly difficult and politically controversial issue. This report examines these problems and assesses the urban policies adopted to deal with them.
